

Ignacio Martín

Software Engineer | Problem Solver

San Salvador de Jujuy, Argentina · ignacio.martin2205@gmail.com · +54 9 388 415-7277 · github.com/ignaMartin22 · linkedin.com/in/ignacio-martin-6492142b2

PROFILE

Solution-oriented software developer focused on analyzing real-world problems and turning requirements into well-designed, maintainable, and scalable software solutions. Experienced across the full development lifecycle, from requirements analysis and domain modeling to REST API design, implementation, testing, and deployment. Strong focus on Angular, React, Node.js/Express, and Java Spring Boot, with experience integrating AI capabilities into applications.

EXPERIENCE & PROJECTS

Full-Stack Developer & Technical Lead — Khai Tienda

Freelance Project · May 2026 – June 2026

- Designed and built an end-to-end e-commerce platform with Angular 19, Node.js/Express, and MongoDB Atlas, including storefront, cart, orders, and an admin dashboard.
- Designed JWT authentication and role-based access control, plus product, category, and stock management with Cloudinary image integration.
- Deployed the backend with Render and GitHub-based CI/CD, and integrated the Claude API to automate product-description generation.

Full-Stack Developer & Technical Lead — OversizeX

Team Project · Mar 2025–Jun 2025

- Led development from requirements analysis and domain modeling through implementation and production deployment using Angular, Node.js/Express, and MongoDB.
- Designed RESTful APIs and a service-oriented application structure for product, order, and user management, including authentication and validation.
- Coordinated Git/GitHub workflow and established clear frontend-backend API contracts to reduce integration issues during delivery.

Backend Developer — School Management API

Academic Project · Jan 2024–Jun 2024

- Developed a Spring Boot REST API with layered architecture, request validation, and separation of concerns.
- Implemented JPA/Hibernate persistence, DTOs, and MapStruct, and wrote JUnit tests for service behavior and business rules.
- Documented API endpoints, payloads, and integration guidelines with ApiDog.

TECHNICAL SKILLS

Languages	Java · TypeScript · JavaScript · SQL
Frontend	Angular 19 · HTML5 · CSS3 · RxJS
Backend	Node.js · Express.js · Spring Boot · REST APIs · JWT
Databases	MongoDB · MongoDB Atlas · MySQL · JPA / Hibernate
DevOps	Docker · Git · GitHub · Render · CI/CD · Cloudinary
Testing & AI	JUnit · Swagger · ApiDog · Claude / Anthropic API · Prompt Engineering

EDUCATION

Analista Programador Universitario

— Universidad Nacional de Jujuy, Facultad de Ingeniería
2023–Present · Software engineering, databases, algorithms, systems architecture, and object-oriented development.

Técnico en Equipos e Instalaciones Electromecánicas — Escuela de Educación Técnica N°1 “Escolástico Zegada”
2017–2022

LANGUAGES

Spanish (Native) · English (B2)
